Expression of Interest
Seeking Business Partner for RJ North Operations

100 kboped from RJ North| $ 500 Mn or more per annum | Long-Term Contract Opportunity

Cairn, Vedanta Oil and Gas Limited is **India's private upstream company** is committed **to invest $5 Bn in its brownfield assets** with the goal of securing 50% of India's domestic energy needs and having presence across country with **45 blocks** in Onshore, Offshore and Deepwater.

RJ North is one of the key producing assets of Cairn, Vedanta. It comprises of three major fields - Mangala, Bhagyam, Aishwarya and is **India's largest onshore discovery** (2004). Operational since 2009, this asset attained a peak production of **200 KBOEPD**. Cairn has almost sulphur free, sweet crude and the asset is currently operating with world-class infrastructure and reservoirs.

We are looking for a business partner to share the know-how and manage our fields as we have running asset and management team. Cairn has huge potential to increase both production and reserves. We are looking for **~1 billion barrels** of probable resources and reserves. We are looking for a business partner to improve RJ North production and bring latest technology to improve volume, reserves and optimise costs and scale up to **100KBOEPD** production. The business partner may manage the activities both on-site and remotely as required.

The selected partner will develop the overall conceptual design to enhance the production and reserves through production optimisation, debottlenecking, infill drilling, well interventions, disciplined reservoir and subsurface management, recovery enhancement, EOR and growth projects.

Partner may participate independently or can form a consortium and will have full management support for successful execution.

The Ask

1. Safety, planning and operational governance
2. **End-to-end accountability for RJ North operations –** Reservoir, Wells, Facilities and Terminal.
3. **Field Assessment, Conceptual design & Development to increase R&R**
4. **Production and recovery enhancement** through latest technologies, EOR techniques, and full-field development.
5. **Production uplift from 42 to 100** kboepd
6. **Quick Mobilisation** of team and other resources

The Ideal Partner

- **Track record** of managing similar asset/s and operations
- **Strong technical capability** and experience in Subsurface/ Drilling /Facilities /Production /Operations
- **Technology-led and AI/data-driven approach** to Subsurface, production performance & EOR.
